Application No. 10/053,578 Docket No.: 1381-0284P

Amendment dated February 27, 2006 After Final Office Action of August 26, 2005

AMENDMENTS TO THE CLAIMS

1. (Currently amended) A kit for installing shaft equipment for an elevator including at

least one guide rail, the kit comprising a suspension elementelements, the suspension element

elements being temporarily attachable-fixed to a ceiling of an elevator shaft or an upper part of a

wall of the elevator shaft, and suspension means for carrying or supporting shaft equipment at

least during installation, the suspension means being connectable to a hoisting device carrying an

elevator car, a roof of the elevator car being usable for installation of the shaft equipment and the

hoisting equipment and the hoisting device moving the elevator car during installation of the

guide rail wherein an overspeed governor is temporarily mounted to one suspension element, the

suspension means is temporarily mounted to another suspension element, and a further

suspension element forms an auxiliary suspension means during installation of the elevator.

2. (Previously Presented) The kit as defined in claim 1, further comprising a mounting

tool, the suspension means being set on the suspension element from a top floor by the mounting

tool.

3. (Previously Presented) The kit as defined in claim 2, wherein the mounting tool is a bar

or rope with one end provided with means for mounting the suspension means.

4. (Canceled)

Application No. 10/053,578

Amendment dated February 27, 2006

After Final Office Action of August 26, 2005

5. (Currently amended) The kit as defined in claim-4_1, further comprising a mounting

tool for the means for supporting the overspeed governor to be set on the suspension element

from the top floor.

6. (Previously Presented) The kit as defined in claim 5, wherein the mounting tool

comprises a bar with one end provided with a device for mounting of shaft equipment.

7. (Currently amended) The kit as defined in claim-41, wherein the supporting means

further comprising a mounting base for the overspeed governor, the mounting base having at

least one adjusting element for adjusting a vertical height of the overspeed governor.

8. (Previously Presented) The kit as defined in claim 1, wherein the shaft equipment

includes at least one elevator rope, the hoisting device being separate from and non-connected to

the at least one elevator rope.

9. (Canceled)

10. (Previously presented) The kit as defined in claim 1, wherein the roof of the elevator

car is a working platform and wherein the elevator car is moved by the hoisting equipment with

the roof of the elevator car being the only working platform within the shaft during installation.

7

Docket No.: 1381-0284P

Application No. 10/053,578

Amendment dated February 27, 2006

After Final Office Action of August 26, 2005

11. (Previously presented) The kit as defined in claim 1, wherein a hoisting rope extends

from the hoisting device to the elevator car, the hoisting device being adjacent the suspension

means at a top of the elevator shaft with the hoisting rope extending along the shaft when the

elevator car is at a bottom of the shaft.

12. (Previously presented) The kit as defined in claim 1, wherein the hoisting device is

adjacent the suspension means at a top of the elevator shaft.

13. (Previously presented) The kit as defined in claim 12, wherein the elevator car is

movable through out the elevator shaft by the hoisting device which is at the top of the elevator

shaft.

14. (Previously presented) The kit as defined in claim 13, further including a safety pedal

mounted on the roof of the elevator car, the safety pedal controlling release of safety gear to

permit movement of the elevator car.

15. (Previously presented) The kit as defined in claim 1, further including a safety pedal

mounted on the roof of the elevator car, the safety pedal controlling release of safety gear to

4

permit movement of the elevator car.

16. (Previously presented) The kit as defined in claim 15, wherein the safety pedal stops

movement of the elevator car independently of the hoisting device.
